

Berlin is calling

© Matthew Dixon / ThinkstockPhotos

A tourism hotspot, a city steeped in history and a cultural melting pot – this mixture makes Berlin an unique place with unlimited opportunities and the number one congress location in Germany.

The city that never sleeps

After a busy and exiting day at the congress, Berlin welcomes you with Europe's largest museum complex, the Museum Island, a UNESCO World Cultural Heritage. Berlin also has over 50 theatres, 3 opera houses and numerous exhibitions. The Brandenburg Gate, once a symbol of the divided Germany, has become the emblem of the German capital. Nearly all traces of the wall that divided Berlin for almost 30 years have disappeared and today Berlin is situated in the heart of the European Union. Berlin definitely lives up to its name as “the city that never sleeps”.

The place where it's all happening

Messe Berlin is the international meeting spot of Berlin. WCP 2017 will mainly take place in the recently constructed venue CityCube Berlin and its adjacent halls. The CityCube provides state-of-the-art infrastructure and a full portfolio of trade fair services that can be adapted to the needs of exhibitors, organisers and visitors.

Messe Berlin | Main Entrance: Messe Süd | Jafféstraße | 14055 Berlin, Germany

One congress – many players

The World Psychiatric Association organises the World Congress of Psychiatry every three years. In 2017 this remarkable event will take place in Germany's capital, Berlin, and be jointly hosted by the WPA and the German Association for Psychiatry, Psychotherapy and Psychosomatics (DGPPN). CPO HANSER SERVICE has been appointed as the congress and exhibition office for the WPA XVII WORLD CONGRESS OF PSYCHIATRY.

Psychiatry and psychotherapy at its best

In 2017 Berlin will warmly welcome the world of psychiatry and psychotherapy: the WPA XVII WORLD CONGRESS OF PSYCHIATRY (WCP 2017) will be held from 8–12 October 2017 and jointly hosted by the World Psychiatric Association (WPA) and the German Association for Psychiatry, Psychotherapy and Psychosomatics (DGPPN). Under the overall theme “Psychiatry of the 21st Century: Context, Controversies and Commitment” renowned experts from all over the world will present and discuss current issues in science and care.

International networking

This outstanding international scientific event offers an ideal opportunity to take stock of the state of psychiatry and to share the vision and future directions of exciting developments in the field and to meet national and international professionals.

Varied scientific programme

One of the core components of the WCP 2017 is the educational programme, which focuses on subject-specific and interdisciplinary contents and practical skills. Furthermore the scientific programme will contain numerous Joint Sessions with all three stakeholder groups – psychiatrists and other health professionals; service users; and family carers – and thus present the full range of perspectives.
