WPA meets DGPPN – Welcome to Berlin, Welcome to the World Congress 2017

*Top international gathering in psychiatry and psychotherapy*

Over the coming days, the World Congress 2017 will offer an outstanding opportunity to take a look at the current state of psychiatry and learn about the vision and future direction of exciting developments in the field. Not only will the congress focus on new research findings, but it will also look closely at current developments in the prevention, diagnosis, treatment and rehabilitation of mental illnesses.

DGPPN is proudly hosting this year’s WPA World Congress. WPA and DGPPN – two strong organisations that campaign nationally and internationally for quality in research, further education and the care of people with mental illnesses. The congress aims not only to foster the transnational transfer of knowledge between experts from various disciplines but also to further advance the dialogue in Germany and throughout the world between psychiatrists and people with mental illnesses and their relatives.

Dear Colleagues and Friends,

It is with great honour and pleasure that we welcome you to Berlin for the 17th World Congress of Psychiatry 2017.

The World Psychiatric Association (WPA) is committed to improving the health care of psychiatric patients through raising the standards of training, education and clinical practice by providing added value. This Congress will be an excellent opportunity to share academic and clinical developments and research and to build on social interactions and support each other.

Needless to say, in the current period of the 21st century psychiatry is at a point where biological, social and psychological factors are changing rapidly, and their interaction provides us with opportunities to take the profession forward. Apart from being the most complex, intellectually stimulating and rewarding medical speciality, psychiatry is at a stage where we are beginning to understand more about brain changes and their impact on an individual's functioning. In addition, we are starting to better understand cultural and social factors and how they provide possible explanations for our understanding of our patients’ experiences and those of their families.

Several countries across the globe provide innovative services in spite of limited resources. This congress provides a showcase for such developments and how we can learn from each other by sharing experiences and lessons. This World Congress is an ideal opportunity to take stock of the state of psychiatry in the 21st century and the direction of future developments.

You can look out for highlights include Plenaries by Sir Michael Marmot on Social Determinants, Sir Anand Satyanand on Human Rights, Bruce Cuthbert on the Research Domain Criteria (RDoC) project and other leading experts will discuss the future of psychopathology. Prabha Chandra from India’s leading mental health centre NIMHANS will talk about the special characteristics of women’s mental health and sex-specific treatment approaches. Sir Michael Meaney, neurobiologist and leader in the field of epigenetics, will give a lecture about the genetic and epigenetic basis of differential susceptibility to adversity. Linda C. W. Lam, expert in dementia, will discuss life styles, mood and cognition in old age.

I am sure that you will have discovered many other events in the programme. We wish you interesting, insightful congress days and a productive professional as well as social exchange.

Dinesh Bhugra, United Kingdom
WPA President (2014–2017)
Welcome address
Mental health as a global challenge

Dear Colleagues and Friends,

Mental illness is one of the greatest challenges facing societies worldwide. It affects a huge proportion of the world’s population – at least 600 million people live with a mental illness and at least an equal number who are their carers suffer with them. Mental illnesses have significant socioeconomic consequences and are among the most important causes of disability.

During the XVII World Congress of Psychiatry leading experts from all over the world will present new knowledge about the prevention, diagnosis and treatment of mental illness and discuss new solutions for patient care. The various event formats of the World Congress – lectures, symposia, discussion forums and courses – will allow the presentation and debate of new and controversial findings that stem from clinical practice, neurobiology, pharmacology, psychotherapy and social psychiatry. For example, one of the leading age researchers, Andreas Kruse from Heidelberg enriches the programme with his impressive expertise on ethical and social issues of aging and age. Peter Falkai, Co-Chair of the Scientific Committee and leading expert in the field of psychotic disorders, will talk about state-of-the-art and further directions of non-pharmacological interventions in schizophrenia and Andreas Heinz, renowned expert in psychopathology, will provide his detailed knowledge. The Austrian social psychiatrist Michaela Amering a leader in the development of the worldwide service users movement will talk about the “recovery-concept”. People with mental illnesses and their relatives will further enhance the programme and allow us to benefit from their experiences and knowledge. Numerous sessions with service users and family carers emphasise the importance of involving all parties and aim at promoting communication and networking. Peter Lehmann from Berlin for example will give a lecture about the reduction of life expectancy among psychiatric patients. Beside that there will be a special programme focus for young professionals and a wide range of sessions offering films and readings dealing with different perspectives on mental health.

The WPA XVII WORLD CONGRESS OF PSYCHIATRY 2017 BERLIN is an exceptional opportunity for international and interdisciplinary contacts and for gaining new impulses for work in the service of the people with mental illness, for education about psychiatry and for new research initiatives.

We look forward to welcoming you in Berlin!

Local Organising Committee of the WPA XVII WORLD CONGRESS OF PSYCHIATRY
Andreas Heinz, Isabella Heuser, Arno Deister, Peter Falkai, Wolfgang Gaebel, Iris Hauth, Fritz Hohagen, Norman Sartorius
Dear Delegates of the World Congress of Psychiatry,

Your World Congress is one of the highlights on Berlin’s conference calendar this year, with around 12,000 experts from all over the world coming to our city to exchange expertise and discuss the latest research and prospects in the area of mental health. Berlin is honoured to be hosting this prestigious event.

In this spirit, I would like to welcome you to Berlin for the World Congress of Psychiatry 2017.

I am confident that you will feel at home in our city. Not only is Berlin one of the world’s leading trade fair and congress venues, providing ideal conditions for focused professional interaction, our advantages as a conference venue also include the city’s scientific landscape. Along with Charité-Universitätsmedizin Berlin, Berlin’s flagship of modern medical research and practice, you will find a broad spectrum of public and private hospitals, excellent colleges and universities, and a host of renowned non-university research institutes doing cutting-edge research.

Along with its health care expertise, the city scores points with a wealth of other attractions. Anyone attending a conference in Berlin should take advantage of the opportunity to visit one of our many museums, theaters, or concert halls. Another good idea would be to take a stroll through one of our trendy neighborhoods and enjoy the relaxed attitude towards life of our vibrant and diverse metropolis.

And with that I would like to welcome you to Berlin once again. I wish you a productive World Congress of Psychiatry 2017 and a very pleasant stay that you will long remember.

Sincerely,

Michael Müller, Germany
Governing Mayor of Berlin

Hand in hand for the congress

WPA and DGPPN can both look back on a long tradition of hosting congresses and are both committed to quality in research, care and education in the field of mental health. Other core tasks include the acceptance of mentally ill people and active promotion of the dialogue between psychiatrists, service users and their families.

WPA – World Psychiatric Association
The WPA is an association of national psychiatric associations that aims to increase the knowledge and skills necessary for work in the field of mental health and for caring for the mentally ill. It currently has 138 member societies spanning 118 different countries and representing more than 225,000 psychiatrists.

The WPA organises the World Congress of Psychiatry. It also organises international and regional congresses and meetings and thematic conferences. The WPA has 72 scientific sections that disseminate information and promote collaborative work in specific domains of psychiatry and it has produced several educational programmes and series of books. Furthermore, it has developed ethical guidelines for psychiatric practice, including the Madrid Declaration (1996).

More information is available here: www.wpanet.org

ψ DGPPN
The DGPPN is a vibrant medical professional society. Founded in 1842 it currently has more than 8,900 members. It is thus the largest and oldest scientific association of doctors and scientists working in the field of psychiatry, psychotherapy and psychosomatics in Germany.

The work of the DGPPN is based on the vision of a society in which people with mental illnesses can live free from prejudice and receive the personalised care and necessary help they need. The DGPPN believes that optimal, scientifically founded and individualised medical, psychological and social support should be available to everyone at all times and in all places.

More information is available here: www.dgppn.de

CPO HANSER SERVICE – Congress and Exhibition Office
CPO HANSER SERVICE has been appointed as the congress and exhibition office for the WPA XVII WORLD CONGRESS OF PSYCHIATRY.

CPO has been in business as a Professional Congress Organiser (PCO) since 1984 and has organised over 6,000 conferences and events with up to 14,000 participants. CPO is a specialist in the field of congress and event management in Europe and worldwide.

Session types

Keynote Lecture 30 – 60 min
The Keynote Lectures feature world-renowned speakers. These invited experts will talk on a main topic of the congress. Afterwards the audience will have the opportunity to ask questions.

Presidential Symposium 90 min
The Presidential Symposia include events that take a special approach to expand on and develop the main topics of the congress.

State-of-the-Art-Symposium 90 min
State-of-the-Art Symposia on the most important mental illnesses provide a complete update on some significant aspects of current clinical treatments in psychiatry.

Pro-Con-Debate 90 min
In these moderated discussion formats, experts debate controversial issues regarding diagnosis, clinical history and care of people with mental illness. A chairperson moderates whilst two speakers (proponent/opponent) offer a lively and fruitful discussion.

Special Session 60 – 90 min
This category includes sessions, that provide concise information about relevant congress topics or belong to established session series.

Discussion Forum 90 min
A Discussion Forum starts with short statements by 4 to 6 experts. These statements are followed by a moderated discussion.

Symposium 90 min
Each symposium will focus on specific topics of basic, clinical, interface and conceptual issues in psychiatry and represent several points of view. The symposia include a maximum of four presentations and offer an opportunity for discussion.

Workshop 90 min
Workshops are highly interactive sessions with an educational focus. This format is designed to give experts a platform for presentation and networking and to initiate a lively discussion. The workshops consist of 1 or 2 short presentations followed by a discussion.

Oral Presentation Session 90 min
Oral presentations were selected by the Scientific Committee. They were grouped by topics into 90-minute sessions chaired by specialists. Each presentation will be 10 minutes long, including discussion time.

Poster/ePoster Session 90 min
Accepted Posters or ePosters will be exhibited at the congress and presented in guided poster walks of thematically grouped posters. The sessions will be chaired by renowned specialists and give authors the opportunity to present their findings and discuss them with the audience.

Course 4 hours
These sessions present the current state of the art and recent advances in clinically relevant topics. Courses are designed to provide a learning experience. The number of participants is limited. Each course has to be booked additionally. Attendees will be given the opportunity to interact with the faculty of the course, which is composed of well-known experts.

Nursing/Healthcare Course 2 hours
These sessions present the current state of the art and recent advances in the nursing field.

Industry Symposium 90 min
These sessions are organised and executed by the pharmaceutical industry.

Getting in touch with digital interventions for mental health: practical insights for health professionals

Online psychotherapy and e-mental health are on everyone's lips, but what is behind it? What technical possibilities are there? And how do these programmes work? In the context of this year’s World Congress of Psychiatry renowned scientists will discuss the opportunities and risks of e-mental health and give an overview of the current state-of-the-art of science. This eMEN event addresses psychiatrists, psychotherapists, e-mental health developers and of course the interested public. Psychiatrists and psychologists will report on their experiences with internet-based intervention during psychotherapy in their clinical routine. Another highlight of the event will be a start-up slam: Six innovative companies will present their ideas for the digital support of psychotherapy. Finally, all presented e-mental health tools and programmes can be tested on site and discussed with the developers.

eMEN is a six country, e-mental health project funded by the Interreg North West Europe Innovation Programme, which will run until November 2019. eMEN is led by the Netherlands with partners in Belgium, France, Germany, Ireland and the UK who combine technological, clinical, research and policy expertise. The project will undertake a unique combination of digital mental health activity in research, product development, policy and communications and create a legacy transnational e-mental health platform to unlock the power of technology to improve Europe’s mental health. The project partners are pictured above.

Awards
Recognition of excellent achievements

The Geneva Prize and the Jean Delay Prize highlight the achievements for human rights and recognise exceptional research in psychiatry.

Geneva Prize for Human Rights in Psychiatry

The Geneva Prize for Human Rights in Psychiatry 2017 is awarded to a non-governmental organisation fighting for the rights of the mentally ill in Guatemala, ALAS PRO SALUD MENTAL

Founded in 2013, this organisation is at present the only NGO in Guatemala working to assist the access of the indigenous rural population to psychiatric care.

The Geneva Prize Jury particularly valued the work from among 15 candidates comprised of individuals, institutions and NGOs. The President of the Jury, Luc Ciompi, Professor Emeritus of the Department of Social Psychiatry, University of Bern, Switzerland, drew attention to the fact that ALAS PRO SALUD MENTAL works in a particularly defavoured region of the world, dominated by poverty and violence and ravaged by a long civil war and by natural catastrophes (hurricanes). The Jury considered that the work of ALAS PRO SALUD MENTAL is courageous because of the real dangers which exist to those involved. This NGO has been successfully fighting for human rights in Guatemala against the stigma and discrimination from which the mentally ill suffer – thus fulfilling the specific objectives of the Geneva Prize.

The Geneva Prize for Human Rights in Psychiatry was created in 1999 in Geneva, Switzerland on the occasion of the 50th anniversary of the Universal Declaration of Human Rights. In 2017 the 20,000 Swiss francs’ Prize will be awarded for the 7th time and will be presented to ALAS PRO SALUD MENTAL in Berlin in October 2017, on the occasion of the 17th World Congress of Psychiatry.
Jean Delay Prize

Jules Angst is awarded the WPA Jean Delay Prize 2017. The Jean Delay Prize is the most prestigious award that WPA gives triennially. It is awarded to an individual who has made a major contribution in the biological, psychological or social aspects of psychiatry or has built useful bridges between them.

Jules Angst, Department of Psychiatry, Psychotherapy and Psychosomatics, University of Zurich, Switzerland is awarded the WPA Jean Delay Prize 2017. At its meeting, the International Jury unanimously decided to award the Prize to him. This consists of a certificate and a cheque for EUR 40,000 paid for by SERVIER. The Prize will be presented by WPA President Dinesh Bhugra at the opening ceremony of the World Congress of Psychiatry, Berlin on Oct 8, 2017. Hearty congratulations to Jules Angst on this achievement.

Bio sketch

Jules Angst, MD, is Emeritus Professor of Psychiatry at the University of Zurich, Switzerland and Honorary Doctor of the Universities of Heidelberg, Germany, and Craiova, Romania. In his early twenties Jules Angst qualified as a Jungian analyst. He trained in psychiatry under Manfred Bleuler at the Zurich University Psychiatric Hospital (the Burghölzli), where he went on to head the Research Department from 1969 until his retirement in 1994. His publications span the past 60 years of clinical psychiatry. He remains active in epidemiological and clinical research. Jules Angst’s monograph (1966) established and validated the distinction between bipolar disorder, depression, and schizoaffective disorders on the basis of genetics, course, and personality. Later patient studies led to the development of a new mood spectrum concept of three dimensions: syndrome (mania to depression), severity (normal to psychotic) and temperament. He proposed improved diagnostic concepts of bipolar-I and bipolar-II disorders. His early work in clinical psychopharmacology established the efficacy of and the familial response to imipramine (1964). On the basis of multicentre studies he provided statistical evidence for the long-term efficacy of lithium (1970). His more recent work focused on the long-term prophylactic role of antidepressants and atypical neuroleptics in suicide prevention, the early onset of action of antidepressants, “drug-induced” hypomania, and the effect of lithium against dementia in patients with mood disorders.

FOCUS ON MENTAL HEALTH

The DGPPN is the largest scientific medical association focussing on mental health in Germany. It pools the competence of 9,000 doctors and scientists in the fields of psychiatry, psychotherapy and psychosomatics who work in university and non-university hospitals, in office-based practices and in research.

The association campaigns for the optimal care of patients with mental illnesses. It develops scientific guidelines, promotes training and further and continuing education and is involved in research into mental illnesses to advance diagnostics and treatment. The main focus is thereby on the holistic view of people and their individual mental, physical and social characteristics. The DGPPN actively advocates for the participation of people with mental illness in society and against their stigmatisation.

Psychiatry and art
The period of National Socialism is the darkest chapter in the history of psychiatry in Germany and thus also in the history of the DGPPN predecessor organisations. People with physical and mental impairments were systematically persecuted and exterminated – in the midst of German society – and psychiatrists were partly responsible.

Registered, persecuted, annihilated: the Sick and the Disabled under National Socialism

In 2009 the DGPPN acknowledged its special responsibility resulting from the involvement of its predecessor organisations in the crimes of National Socialism, the killing of huge numbers of ill people and forced sterilisations. It initiated a research project that culminated in 2014 in the German- and English-language travelling exhibition “registered, persecuted, annihilated”. Meanwhile, more than 300,000 visitors have seen the exhibition nationally and internationally. The exhibition will be on display during the World Congress 2017.

The exhibition is specifically aimed at a wide audience. Using the question of the value of life as a guiding principle, it considers the intellectual and institutional prerequisites of the killings, summarises the events from exclusion and forced sterilisations up to the Holocaust, presents examples of victims, perpetrators, accomplices and opponents and finally looks into how the events of that period have been dealt with from 1945 until the present day.

Dorothea Buck – a special destiny

Born in 1917, Dorothea Buck was overcome by a severe mental crisis at the age of nineteen. During the Third Reich, she was classified as a minor human being because of her diagnosis of schizophrenia. In accordance with the Nazi race policies she was forcibly sterilised in 1936. A few years later she barely escaped “euthanasia”. Contrary to all prognoses – related to her incurable mental illness – Dorothea Buck tried to understand what drove her into psychosis and developed her own theory of her illness. Through this process she found the key to her own sanity. This development is inseparably linked with her evolution to an expressive and highly distinguished sculptress.

Dorothea Buck’s artistic work has gained particular significance. Her accentuated lines give rise to impressive sculptures that appear to evoke what she was denied in the so-called sanatoriums: human attention and warmth. The film “The sky and beyond” depicts the life and work of this extraordinary woman, who is now 100 years old.

Artists as victims and survivors of National Socialism

The life and work of artists with mental illness represent a special challenge and opportunity in the discussion of the Nazi and post-war periods: through their art, we encounter people with an evocative destiny. The pictures move us by creating a personal and active dialogue.

The exhibition focusses on two artists, the architect and painter Paul Goesch, born in 1885, and the locksmith Julius Klingebiel (1904–1965). Their paintings stand for the numerous patients who became victims of Nazi psychiatry. Paul Goesch created important expressionist paintings while still in a mental asylum. He was killed in Brandenburg in 1940. Julius Klingebiel was forcibly sterilised, avoided the killing campaigns and survived the war. In the post-war period he created a solitary art environment ("Raumkunstwerk") in his cell which will be shown at the congress.

In villages of the Ivory Coast and Benin, thousands of mentally ill people live as so-called “people in chains”. They are chained to trees or locked into dark crates. They are tethered up like animals, sometimes for weeks, sometimes for years. Some die in captivity. Society is afraid of them; the belief still prevails that mentally ill people are possessed by demons.

Monday to Thursday | Hall 2.2

The local organisation St. Camille de Lellis has been working since 1991 to free these people from their chains and care for them appropriately in treatment centres. The non-profit organisation “Freundeskreis St. Camille”, based in Reutlingen, Germany, has been supporting these efforts for more than 20 years through personal engagement, food and medicine. The aim is for the mentally ill people to return to their villages and receive long-term psychopharmaceutical treatment. The best way to enlighten people is to re-integrate the mentally ill into their communities and thus take away people’s fear, particularly from the families.

The exhibition “People in Chains: how mentally ill people are dealt with in West Africa” was designed by the museum MuSeele, a museum on the history of psychiatry located in the psychiatric hospital Christophsbad in Göppingen, Germany, in collaboration with the “Freundeskreis St. Camille”. This travelling exhibition consists of large-format colour photographs by the photographers Heinz Heiss and Uli Reinhardt together with short explanatory texts. An accompanying brochure provides additional background information.

“What interests me is – being a human” said Dr. Rieux in Camus’ novel “The Plague”. “Being A Human” is a collection of photographs portraying people in Jimma, Ethiopia. These people face each other, share their day with happiness, anxiety, desperation and hope. Their feelings are depicted with peculiar ease. Sorrow and pessimism are seen in a playful and airy atmosphere.

Monday to Thursday | Hall 2.2

Grace of human solidarity and joie de vivre is what we should not stop to learn from Camus. Jimma stands for everywhere!

The story behind the pictures is: These individuals seek help for mental distress. They are patients at the Department of Psychiatry at Jimma University in Ethiopia.

In 2010, Jimma University with Prof. Markos Tesfaye and the Center for International Health of Ludwig-Maximilians University Munich have launched a Masters programme for Mental Health in Jimma, a town in southwestern Ethiopia. Up to now about 50 students finished the programme and work as Masters for Mental Health, caring for the well-being of people with mental distress all over Ethiopia. They provide a space for an integrated understanding of mental illness – building bridges between traditional beliefs and modern psychiatric and psychotherapeutic treatments. The Masters programme itself is meanwhile fully organised and staffed by previous Masters.

Touching photography – perhaps the only people who are still interested in the mental asylums of the past are the photographers of the urban exploration (“Urbex”) movement. Christoph Burger is one of them. Since 2013, he has made numerous trips to the Manicomio abbandonati of Italy.

Monday to Thursday | Hall 2.2

The history of psychiatry in Italy is one of dramas and tragedies. Forgotten by society, legally incapacitated, mentally and often also physically tormented, patients were locked away in inhumane conditions, deprived of their dignity and marginalised until far into the 20th century.

The darkest chapter in psychiatry was the rule of Benito Mussolini, which lasted from 1922 to 1943. In this period of fascist terror thousands of political dissidents and people out of favour with the regime were declared to be mentally ill and deported to a “Manicomio” – with the aim of destroying them mentally or even physically.

May 1978 marked a watershed in the history of psychiatry in Italy. Under the initiative of the psychiatrist and hospital director Franco Basaglia, the parliament in Rome passed the psychiatric reform. The declared aim was to introduce “humane psychiatry” by closing all Manicomi and creating sufficient places to provide outpatient care. Although most hospitals were closed and many patients were released, there were problems with creating the new points of care.

The bold project faltered in its early stages; no one built the dense network of decentralised treatment centres that should have accompanied the gradual closing of the hospitals. Apart from thoroughly laudable private initiatives, every effective health service for the released patients was lacking.

When Christoph Burger documents the decay in almost inaccessible rooms, he does so without artificial light and in keeping with the Urbex rule “Take nothing but pictures. Leave nothing but footprints.” Nothing is rearranged, everything is left as it is found. These trips have resulted in the series of images “Manicomio”.

Richard Kogan has led a distinguished career as both a professional pianist and as a physician. While studying medicine at Harvard, Dr. Kogan was encouraged to continue his music career along with his medical education. In later years, he began to merge these two fields and now explores the role of music in healing and discusses the impact of psychological and mental illnesses on the creative genius of well-known composers.

Schumann: bipolar disorder and the creative process
Tue, 10 Oct 2017 | 17:00 – 18:30 | Hall B

The great 19th century German composer Robert Schumann (1810–1856) represents one of the best examples of the complex relationship between creative genius and mental illness. A prominent figure in music’s Romantic era, Schumann ignored traditional styles and wrote compositions that were based purely on a desire to express his inner state of mind. While it is challenging to do retrospective psychiatric diagnoses on historical figures, Schumann wrote letters and kept detailed diaries which strongly suggest that he suffered from bipolar disorder.

Psychiatrist and pianist Richard Kogan will trace the course of Schumann’s psychiatric illness and will explore:

» How Schumann composed voluminously during hypomanic periods but stopped writing completely toward the end of his life when a severe depression culminated in a suicide attempt and eventual self-starvation in an insane asylum.

» How Schumann used musical composition to soothe his intrapsychic distress.

» How Schumann wrote powerful music at the urging of inner voices but was ultimately tormented by his auditory hallucinations.

Kogan will perform some of Schumann’s most magnificent piano music to illuminate the discussion. He will analyse how extreme fluctuations in mood can be both potentially beneficial and harmful in the creative process, explore Schumann’s fascinating relationship with his wife the virtuoso pianist Clara Wieck and will describe the nightmarish conditions in 19th century psychiatric hospitals and contrast this with 21st century treatment practices.
With “The Bipolar Roadshow” the German Association for Bipolar Disorders (Deutsche Gesellschaft für Bipolare Störungen e.V., DGBS) would like to draw attention to the particular problems of people with bipolar disorders and their relatives. The illness often has devastating social consequences: many people with a bipolar disorder can no longer work; friendships, marriages and families break down. However, with the proper care bipolar disorders are generally highly treatable.

The Bipolar Roadshow – an anti-stigma and informational project
Wed, 11 Oct 2017 | 17:30 – 19:00 | Hall A4

The Bipolar Roadshow presents information about bipolar disorders in a way that is easy to understand and entertaining. Bipolar disorders are often associated with creativity. Many distinguished artists had or have a bipolar disorder: Robert Schumann, Hermann Hesse and more recently Kurt Cobain, Amy Winehouse and Bruce Springsteen. The Bipolar Roadshow also wants to build a bridge between art and the illness. It does so by showing works by fine artists with a bipolar disorder as an accompaniment to a book reading and musical entertainment.

The Bipolar Roadshow also sees itself as an anti-stigma project: three artists with a bipolar disorder appear in public and talk or sing about their experiences with the illness and thus show that there is no reason to be ashamed.

Mental disorders are also an important topic in literature. The congress offers the opportunity to personally get in touch with a series of authors. As patients or family members, they set down their own personal story to share valuable insights.

Reading Sessions and author table on Tuesday and Wednesday:
The author table in Hall 2.2 will be staffed from 10:00 – 17:00.

The readings either in German or English language will take place parallel from 12:00 – 13:00 in Room R2 and Room R3 (Tuesday, 10 October 2017), Room R4 and Room R5 (Wednesday, 11 October 2017).

Tue, 10 Oct 2017 | 12:00 – 13:00 | Room R2

**Hans-Otto Thomashoff, Austria**

Descriibes in *Das gelungene Ich – Die vier Säulen der Hirnforschung für ein erfülltes Leben*, how strongly we are determined by emotions – and how we can use them.

**Christof Held, Switzerland**

Das Buch *Bewohner* tells the story of seven affected people, long before the first symptoms of illness appear and reports also literarily about the pain and suffering of the residents, their relatives and the caregivers at an advanced stage of the disease.

**Stefan Lange, Switzerland**

In a tagebuchartigen Rückblende erzählt Stefan Lange in *SUICIDE* the story of a passionate love, a life between Manic and Depression. The language is strikingly clear; unmercifully open, cynically brutal and yearningly hopeful.

Tue, 10 Oct 2017 | 12:00 – 13:00 | Room R3

**Jim and Mary Maddock, Ireland**

A touching and finally encouraging story *Coming off psychiatric drugs – chapter "A Couple’s Slow Awakening"*: for the first time a family member, in this case the husband, reflects critically his point of view, after his wife was treated with neuroleptics and antidepressants.

**Peter Maeck, USA**

Writer and photographer Peter Maeck approached an extremely difficult time of life – caring for an aging father diagnosed with Alzheimer’s disease. *Remembrance of Things Present* is an important book for our time as dementia nears epidemic proportions; it is wisdom gleaned from facing one of life’s most horrific afflictions with word, image, and love.
Bodo K. Unkelbach, Germany

Der Psychiater schreibt in Heute liebe ich mich selbst! In 7 Schritten zur Resilienz über das Wesen der Selbstliebe und deren Bedeutung für ein glückliches Leben. Detailliert werden die einzelnen Schritte dargestellt, einfühlsam und mit Fallbeispielen aufbereitet.

Kerstin und Friederike Samstag, Germany

Wahnsinn um drei Ecken – Eine Familiengeschichte ist ein Buch über Angehörige, die durch die Erkrankung eines nahestehenden Menschen selbst zu Betroffenen werden und über die Konsequenzen für das System Familie. Ein unverzichtbarer Erfahrungsbericht über das (Selbst-)Verständnis von Menschen im Umfeld der Erkrankten.

Christian Discher, Germany

Darby Penney, USA

The Lives They Left Behind gave rise to a successful campaign to commemorate patients who had been buried in unmarked graves on the grounds of the Willard State Psychiatric Hospital New York and creates a moving and devastating group portrait of 20th-century American psychiatric care.

Peter Lehmann and Volkmar Aderhold, Germany

Kirsten Becken, Germany

Die Tochter einer seelisch erkrankten Mutter, hat Seeing Her Ghosts herausgegeben, um sich selbst etwas von der Seele zu arbeiten und zu zeigen, was sie im Innersten bewegt. Kunst und eine Auseinandersetzung auf Augenhöhe stehen im Vordergrund dieses Buches.
Experiences with mental illnesses provide abundant material for film works. The WPA Congress offers its own platform for diverse genres and invited filmmakers to show their work. All congress participants are cordially invited to join the screenings followed by a moderated panel discussion.

The Wounded Healer  
*(30 min followed by a discussion)*

The genesis of this half hour film is an innovative anti-stigma lecture targeted at healthcare professionals and students given by medical practitioner Dr. Ahmed Hankir. Although targeted at this audience the Wounded Healer also has appeal and relevance to service users, carers and family members and broader society.

Produced by Raw Productions Ltd and funded by the University of the Arts London.

The sky and beyond / Himmel und mehr  
*(90 min subtitled in English followed by a discussion)*

The film reflects on the remarkable life of the 100-year-old sculptor Dorothea Buck who cured herself from schizophrenia. During the Third Reich she was forcibly sterilized and barely escaped „euthanasia“. Buck’s younger sister provides an outside view, reflecting on the dismay and helplessness most families experience when mental illness strikes in their midst. By accentuating the narrative Dorothea Buck’s sculptures bear witness to an impressive body of work.

Astu – so be it
(123 min Marathi with English subtitles followed by a discussion)

Astu is a gentle, seemingly simple film that captures an old man in decline – degenerating physically and losing control of his mental faculties as well. It’s about his gradual fading away. It also captures the dilemmas of the family that is losing someone dear, bit by bit, minute by minute, to dementia.

Art of storytelling: The human experience of being a psychiatrist
(75 min followed by a discussion)

The purpose of this film was to achieve a better understanding of who we are as psychiatrists right now. A committee of six psychiatrists took oral histories from twelve other psychiatrists spanning three generations. The stories are artfully woven together to create a cohesive narrative. What emerges is unexpected and incredibly moving. The stories are deeply personal and highlight the differences and similarities we share as people in doing the work we do.

This documentary was produced by Mindi Thelen for the Southern California Psychiatric Society.

Die Mitte der Nacht ist der Anfang vom Tag
(78 min mit anschließender Diskussion)

Der Film soll das Verständnis für die Erkrankung Depression verbessern – für Betroffene, ihre Angehörigen, aber auch die Öffentlichkeit sowie aufklären, informieren und Vorurteile und Fehlwissen abbauen. Insbesondere möchte der Film auch die Perspektive des Umfeldes – vor allem der Angehörigen – berücksichtigen und deren Anliegen und Bedürfnisse miteinbeziehen.

Social media and suicide prevention? Introducing the YouTube-series “Komm, lieber Tod / Come, dear death”
(33 min subtitled in English followed by a discussion)

The YouTube-series about the suicidal life of Stefan Lange has received an overwhelmingly positive feed-

back from the audience. The goal and method of the biography series is the “Learning From Life Experiences”. Six episodes with English subtitles are shown and the makers will talk about the Papageno-effect and its positive influence on affected persons.

Away from her
(110 min followed by a discussion)

Away from her is a 2006 Canadian drama film written and directed by Sarah Polley and is based on Alice Munro’s short story “The Bear Came Over the Mountain”. The story centers on a couple whose marriage is tested when Christie’s character begins to suffer from Alzheimer’s disease and moves into a nursing home, where she loses virtually all memory of her husband and begins to develop a close relationship with another nursing home resident.

Break out into art – The cell of Julius Klingebiel / Ausbruch in die Kunst – Die Zelle des Julius Klingebiel
(45 min subtitled in English followed by a discussion)

The history of the locksmith Julius Klingebiel comes alive in a thrilling documentary. His fate as a psychiatric patient took him from being arrested by the police and held in psychiatric custody to being consigned for years to a mental asylum. He started to draw in 1951 in the Göttingen “Verwahrungshaus” (safe-keeping house) and by 1961 he had completely filled the walls of his cell with paintings. The author Antje Schmidt depicts his life, suffering and artistic liberation in a moving, scenic documentation.

Through memories – the road to trauma therapy / Durch die Erinnerungen – Wege der Traumatherapie
(40 min subtitled in English)

The film addresses patients who suffer from PTSD. Its aim is to help them muster up the courage to seek the best-suited therapy. Impressive examples of four patients are shown of how these people feel and most important of all, how they have been helped. Renowned experts explain what exactly PTSD is and the therapies available for its sufferers.

Service Users, Family Carers, NGOs and NPOs
The congress is dedicated to promoting communication and networking between psychiatrists, nursing and allied health professionals and associations of service users and family carers. Therefore a council has been founded that represents several associations for service users and family carers. It shaped the scientific programme by organising Joint Sessions with all three stakeholder groups and thus presenting the full range of perspectives and expertise.

The following associations are members of the council (in alphabetical order):

NGO/NPO exhibition
In recognition of the NGOs/NPOs sector’s importance WPA and DGPPN are pleased to bring together different organisations working in the field of mental health and the numerous service users and family carers groups which are present at this year’s event. NGOs/NPOs have the opportunity to present themselves with a poster and to share their initiatives, perspectives and experience with others. The exhibition is freely accessible for all congress delegates and invites visitors to linger and seek information. Come along and learn about the NGO/NPO work or ask questions.

Early Career Psychiatrists Programme
From young professionals for young professionals
The WCP is not only of interest to seasoned scientists and experts but also wants to connect the generations both within the professional field and across national boundaries. Several workshops, symposia, meet-the-expert sessions, lectures and discussion forums have been specially tailored for early career psychiatrists. Young psychiatrists and those who want to become psychiatrists will have the opportunity to interact directly with leading figures in the field and make valuable contacts. Discover the sessions of the Early Career Psychiatrists Programme (ECP).

MENTAL HEALTH
INTEGRATE
INNOVATE
INDIVIDUALISE

Guided by the motto of “Mental Health - Integrate, Innovate, Individualise”, a special focus of the Congress will be the integration of new technologies and research findings into person-centred approaches to prevention, care and training, at a time in which difficult challenges, such as displacement, war, terrorism and economic constraints, require new answers.

Educational Programme
Continuing education at the highest level

Research, knowledge and practice continually evolve in the field of psychiatry and psychotherapy. At the WPA XVII WORLD CONGRESS OF PSYCHIATRY you can keep your knowledge up to date and expand it. The educational programme will consider scientific and procedure-related knowledge that contributes to the preservation and further development of psychiatric-psychotherapeutic skills. The focus is on the teaching of subject-specific and interdisciplinary contents and practicing practical skills. The congress and the educational programme are certified with continuing education points (CME- and an UEMS-EACCME-accreditation). Abstracts are available online at www.wpaberlin2017.com.

Applicable fees (only in conjunction with the congress registration)

Für die Menschen – gegen Ausgrenzung

So lautet der Leitgedanke für die zahlreichen Aktivitäten des Aktionsbündnisses, die über psychische Erkrankungen aufklären, Stigmatisierung verhindern und Hilfsangebote aufzeigen wollen. Für eine Gesellschaft, die offen und tolerant mit psychisch erkrankten Menschen umgeht!

Wie in jedem Jahr können sich die Kongressteilnehmer- innen und -teilnehmer über die Aktivitäten des Bündnisses und seiner Mitgliedsorganisationen informieren. Die Informationsstände finden Sie in der Messe Berlin, in Halle 2.2.

Aktionswoche Seelische Gesundheit

Die Aktionswoche zum Welttag der Seelischen Gesundheit findet jährlich im Oktober mit zahlreichen Veranstaltungen in Berlin und bundesweit statt.

Hinweis für Journalistinnen und Journalisten – Foto- und Drehgenehmigungen

Binding conditions for image and sound recordings

Unless they are for private use only, image and sound recordings of the WPA XVII WORLD CONGRESS OF PSYCHIATRY 2017 require prior written permission from the DGPPN Press Office. The application for permission must reach the Press Office at least 24 hours before the filming date. The permission does not include the courses offered as part of the educational programme.

Image and sound recordings of the exhibition and Industry Symposia require additional prior permission from the sponsoring company. The permission is only valid for the purpose requested. Every transfer of footage to third parties and every alternative use of footage requires prior permission from the DGPPN.

Kindly note that the Press conferences address primarily German media and thus will not be translated into English.
Promoting communication is one of the key objectives of the congress. All participants are cordially invited to take part in the Networking Reception, which will take place on Sunday, 8 October 2017 at 19:15 in the entrance foyer of Messe Süd.

Drinks will be offered. Early Career Psychiatrists are kindly invited to join the members of the ECP Committee at the reception. A meeting point will be provided where young professionals can easily get in touch with each other and with renowned experts.

The Pin Sharps
Hot Boogie Chicabilly-Sound from Berlin

The Pin Sharps had their stage debut in April 2011 at the Rusty Revolver in Berlin. The four band members – front women Holly Rose (lead vocals and guitar) and Lily Black (backing vocals and upright bass), lead guitarist Stevie, and drummer Carl – came from all over Germany before deciding to form this unique Rockabilly band in Berlin. It goes without saying that before even playing the first chord, you’ll surely notice them. Fronted by two beautiful Chicabellas with Monroe hips and poisoned lips. The Pin Sharps will – and there is no doubt about this – catch your eye! Get ready for to hop, skip, and jump!

Scientific visits and tours
During the congress you have the opportunity to visit several places related to the history of German psychiatry in Berlin. Make sure to secure your ticket at the counter. The scientific visits will be accompanied by an English-speaking guide.

**Charité Berlin – past and present**

The Charité is nowadays one of the largest university hospitals in Europe for medical research and education. It looks back on a 300-year history of healing, research and teaching at the top international level with 3,700 doctors and scientists. It extends over four campuses with almost 100 clinics and institutes under the roof of 17 Charité Centers.

The Berlin Museum of Medical History is the successor of Rudolf Virchow’s Pathological Museum and it is located on the grounds of the Charité in Berlin Mitte. The museum’s special exhibitions focus on current aspects of medicine and medical history of the last four centuries. In its stocks, the museum holds quite a few historical medical collections. They also provide objects for an ongoing material research in the fields of history of science and medicine. The permanent exhibition includes 750 pieces of pathological anatomic (moist and dry) compounds, models and images. Explore the museum on a private guided tour.

**Visit the Medical Historical Museum at the Charité in Berlin**

**Wed, 11 Oct 2017 | 14:00 – 18:00**

In addition, you will participate in a tour of Professor Andreas Heinz’ institute at the Charité Berlin.

**Price per person: EUR 55**

Price includes: admission fee and guided tours in the Museum of Medical History and the Charité, transportation and English-speaking guide.

**Berlin in the 1940’s – in memoriam of the victims**

You will visit the Topography of Terror – one of the most frequently visited places of remembrance in Berlin. During the "Third Reich" the headquarters of the Secret State Police, the SS and the Reich Security Main Office were located at the site. The permanent exhibition “Topography of Terror: Gestapo, SS and Reich Security Main Office on Wilhelm- and Prinz-Albrecht-Straße” focuses on the central institutions of the SS and police during the “Third Reich” and the crimes that they committed throughout Europe. There you will have some time to individually explore the exhibition.

The second stop of the tour will be the T4 Memorial and Information point for the victims of the “Euthanasia” killings. Dr. Rotzoll, an expert at the Institute for History and Ethics of Medicine of the University of Heidelberg, will provide insights and background information.

**Visit the Topography of Terror and T4 Memorial in Berlin**

**Thu, 12 Oct 2017 | 15:00 – 18:00**

**Price per person: EUR 35**

Price includes: transportation and English-speaking guide.

Various guided tours in and around Berlin are offered to participants and their accompanying persons during the WPA XVII WORLD CONGRESS OF PSYCHIATRY. All tours will be accompanied by an English-speaking guide. They start and end at the bus parking of the congress venue Messe Berlin, Main Entrance: Messe Süd.

Please check at the congress tour counter which tours are currently available. Tour tickets will be sold on a first-come, first-served basis, so places are limited. Please purchase your ticket at least one day prior to the respective event.

City sightseeing tour Berlin

Sun, 8 Oct 2017 | 14:00 – 17:00
Tue, 10 Oct 2017 | 14:00 – 17:00
Wed, 11 October 2017 | 09:00 – 12:00

For registered accompanying persons this tour is included in the registration fee. Please note that advance registration is required.

The tour will take you through the city centre of Berlin. You will pass the Reichstag, seat of the German Parliament with its famous glass dome, designed by Sir Norman Foster. The bus will then proceed along the green lung of Berlin, the Tiergarten, the former private hunting grounds for the king and the electors of Brandenburg, in which nowadays Berlin’s inhabitants as well as tourists find time to relax.

You will see the Victory Column, crowned with the golden Goddess of Victory and pass by Charlottenburg Palace, a late 17th century baroque masterpiece.

The tour then proceeds to the famous Kurfürstendamm, West Berlin’s main street, lined with elegant shops and cafes. Here, you will also see the Memorial Church, the symbol of the city, preserved as a ruin. You will then continue towards Potsdamer Platz where you will get an impression of what used to be the biggest construction site of Europe.

A historic place and the last stop on this tour will be Checkpoint Charlie, the famous former border crossing in the heart of Berlin. Until the fall of the Berlin Wall on 9 November, 1989, it signified the border between West and East, Capitalism and Communism, freedom and confinement.

Price per person: EUR 35
Price includes: transportation and English-speaking guide.
Jewish Berlin

Tue, 10 Oct 2017 | 09:00 – 13:00

A bus will take you to the Jewish quarter called “Spandauer Vorstadt”, which is the area around Hackescher Markt in the centre of Berlin. The heart of Spandauer Vorstadt is the New Synagogue, which has always been and still is the symbol of Jewish culture in Berlin. Since the 90s, a lot of Jewish restaurants, cafés, institutions – cultural as well as educational – and a Jewish community have settled here. The bus will drop you off at Hackescher Markt for a walking tour.

During the walking tour you will get to know Berlin’s Jewish culture by passing shops, exhibits, restaurants and cafés on August Street, Tucholsky Street and Johannis Street while the guide gives you insider information.

You will be picked up again at the New Synagogue, home to the Centrum Judaicum. The bus will then take you to the Jewish Museum in Berlin-Kreuzberg, which constitutes a spectacular highlight of modern architecture in Berlin. The Jewish Museum was opened in 2001 and gives an interesting insight into the history of the Jewish people. Its outstanding design by Daniel Libeskind is based on a process of connecting lines between locations of historic events and locations of Jewish culture in Berlin. A museum tour will be arranged.

Price per person: EUR 55
Price includes: admission fee and guided tour at the Jewish Museum, transportation and English-speaking guide.

Berlin from Spree Canals

Mon, 9 Oct 2017 | 09:00 – 12:00

A bus will bring you directly to the landing pier Schlossbrücke in Charlottenburg, where you will board a public sightseeing boat. During the Spree Canals tour you will discover Berlin from an unusual and fascinating perspective. The city was once Germany’s second largest inland port and still has more bridges than Venice!

Travel along the Spree and pass such famous sights as the Reichstag, the Berlin Cathedral and Museum Island, site of one of the world’s richest museum complexes, as well as the Nikolai Quarter. Audio guides are available on the boat and our guide will also give you some interesting facts about the buildings and different spots during the boat trip.

Price per person: EUR 55
Price includes: ticket for a public boat tour, transportation and English-speaking guide.
You will go on a half-day excursion to Potsdam – the city, which best reflects the brilliance of Prussian history in many different periods.

The tour will begin with a short bus tour through the city centre of Potsdam. You will also pass the Russian colonnade "Alexandrovka" and the early 18th century settlement "Holland Quarter" with its colourful houses. Afterwards you will visit one of the following Prussian palaces and their beautiful garden. The whole complex was built as the summer residence for the Prussian Royal family.

The Palace Sanssouci was commissioned by Friedrich der Große (Frederick the Great), King of Prussia. The architect Georg W. von Knobelsdorff planned the building, which was erected between 1745 and 1747. The Rococo-style Hohenzollern palace is located within the Park Sanssouci, which is listed among UNESCO World Heritage Sites. The New Palace was erected in the western part of Park Sanssouci between 1763 and 1769. Frederick the Great’s New Palace marks the symbolic end of an era, since after its completion no further baroque palaces were built in Prussia. The head architects were Johann Gottfried Büring (1763 – 1764) and Carl von Gontard (1764 – 1769). Afterwards the bus will bring you back to Berlin.

Price per person: EUR 50
Price includes: admission fee and guided tour at one of the Prussian palaces and park at Sanssouci, transportation and English-speaking guide.

Certificates (CME)
The WPA XVII WORLD CONGRESS OF PSYCHIATRY BERLIN 2017, Germany, from 8–12 October 2017 has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with 28 European CME credits (ECMEC®s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the Union Européenne des Médecins Spécialistes and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 CreditsTM. Information on the process to convert EACCME® credit to AMA credit can be found at www.ama-assn.org/go/internationalcme.

Live educational activities, occurring outside of Canada, recognised by the UEMS-EACCME® for ECMEC®s are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada.

The following European CME credits will be certified:

Congress App

The WPA 2017 Congress App is available for free. With this App you are able to specifically search for sessions, lectures, speakers and abstracts as well as view the current programme schedule. The WPA Congress App was created for iOS and Android Systems.

We kindly ask that all German State-of-the-Art-Symposia are being evaluated by using the App at the end of each session.

Q & A Module (Question & Answer)

Part of the WPA 2017 Congress App is the Question & Answer Module. It enables you to ask questions and make comments with your smartphone during lectures that will take place in Hall B, Halls A1 to A8, Halls Helsinki 1 and 2, Halls Paris 1 and 2, Halls Berlin 1 and 2, Halls New York 1 to 3 and Halls London 1 to 3. Your questions and comments are sent to the chair of each session via a WLAN hall network. The chair then forwards these questions or comments to the speaker.

You can download the App at:

The WPA 2017 Congress App is powered by GLOBIT GmbH in cooperation with esanum GmbH.

Congress App

The whole congress at your fingertips: quickly find your way through the most up-to-date congress schedule. The App is completely free of charge and provides iPhone/iPad and Android users with on-the-go access to the schedule and some exciting interactive features of the congress.

Q & A Module
(QUESTION & ANSWER)

Part of the WPA 2017 Congress App is the Question & Answer Module. It enables you to ask questions and make comments with your smartphone during lectures that will take place in:

» Hall B
» Halls A1 to A8
» Halls Helsinki 1 and 2
» Halls Paris 1 and 2
» Halls Berlin 1 and 2
» Halls New York 1 to 3
» Halls London 1 to 3

Your questions and comments are sent to the chair of each session via a WLAN hall network. The chair then forwards these questions or comments to the speaker.

Stay online!
Free Wifi is available in the foyers, session rooms as well as in the exhibition halls of the Messe Berlin.
